## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. The (OCO)<sub>n</sub> structural piece is unclear. Is the O bound to the Si on the left or the N on the right? For whichever choice is selected, applicants must show that one skilled in the art could have figured out that this choice, and not another, was surely intended.
2. The term “substantially free” is indefinite. What level of purity does this require? Terms of degree, such as “substantial” are indefinite when the specification lacks “explicit guidelines” to distinguish from things which are not so, *Ex parte Oetiker*, 23 USPQ2d 1651, 1655 (1990), and *Seattle Box v. Industrial Crating*, 221 USPQ 568, 574.
3. The Z-superscript-minus in first line of step (c) of claim 12 is presumably in error. It should be Z itself.
4. The “formula II” at the end of claim 12 is surely incorrect.
5. The word “is” is probably missing from before the claim 13 formula.

### *Specification*

The abstract refers to the “Delta A<sup>2</sup> isomer.” This is not correct.
